Upholstered seats and backs combine high-density CFC-Free polyurethane foam over polypropylene substrates. Exposed wood seats and backs are compound curved plywood with various surface veneers. Frames incorporate 7/8" square steel tube legs with 3/4" square tube cross-stretchers. The back is attached using two cast aluminum supports which are staked into the rear legs. Arms may be either glass-filled nylon or cast aluminum. The stack pad is injection-molded plastic. All attachments are concealed.</p>

As such, exposed wood surfaces will not offer the same consistency as man-made materials. Some variation in color, grain, and texture are to be expected, even within the same order. Another consideration is that wood components will tend to darken over time, exaggerating slightly naturally occurring differences. Chairs ordered at different times are likely to be less similar than those ordered together. Therefore, Stylex will not guarantee a precise match of color, grain, or texture of its wood components.</p>
