Product Name

Dau

Designer

Clara del Portillo and Alex Selma of Yonoh Studio

Description

A collection of upholstered sofas, benches, poufs, and lounge chairs, Dau offers every element designers need to create dynamic lounge environments. Optional casters and handles make the pieces easy to rearrange, while complementary tables—including side, coffee, and tablet models—provide surfaces upon which to rest a computer or cup of coffee. Seating comes in multiple sizes, allowing pieces to fill oddly shaped nooks as well as open-plan spaces. All items can stand alone or be grouped, with colors and textiles able to be mixed and matched.

Designed by Clara del Portillo and Alex Selma of Yonoh Studio, Dau suits offices, hospitality settings, and educational facilities.

Created with sustainability in mind, Dau utilizes recycled steel and aluminum in its frames; the items also feature water-based adhesives and plant-based polyurethane foam. Upholstered pieces include single, single plus, and double lounge chairs as well as six shapes and sizes of poufs, including single, double, standard task, and standard lounge. Side tables are available in

small and medium versions, with the coffee table offered with an upholstered base. Surface options range from Caesarstone, solid surface, and solid wood to wood veneer and laminate. Frames come in a choice of 26 VOC-free powder coats. Dau is Greenguard- and Level 1-Certified. The collection is manufactured in the U.S and available in CET, making it easy to specify.

Function

Dau's seating comes in multiple lengths, allowing it to fit in oddly shaped nooks as well as open-plan spaces. Agile and dynamic, the collection suits collaborative environments; it also work well in offices, hospitality settings, and educational facilities.
