

Tested textiles for:

Free Address Screens

Default Orientation RR

Note About Tested Textiles: Please be advised that all approvals listed here are provisional. We reserve the right to withdraw approval at any time, including after an order has been placed. While we attempt to ensure that our approved textile lists are up to date, our upholstery methods do change on an ongoing basis. Such changes may impact the suitability of a given textile for a particular product.

Railroaded (RR) and Up the Roll (UTR) are referring to the textile's application direction.

RR indicates that the fabric is applied to the unit perpendicular to the direction of the roll.

UTR indicates that the fabric is applied to the unit in the direction of the roll.

*Free Address fabrics must be applied RR. Please contact your customer service representative with any questions regarding fabric orientation.

Please note: Each product has its own default orientation. Yardage requirements shown in the price list are calculated based on the products default orientation. Yardage requirements may increase for COM's that show an orientation that differs from it default orientation.
